Vent Visor

Back Driver
Vent Visor

PREPERATION BEFORE INSTALLATION

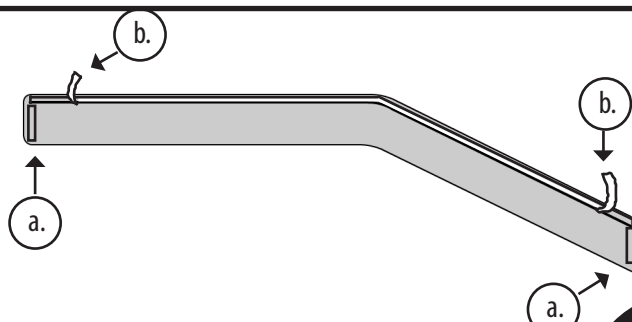

- Do a "trial fit" to make sure you have the correct model of vent visors for your vehicle
- Wash your vehicle thoroughly to remove dirt and debris
- Dry with a clean towel

INSTALLATION STEPS

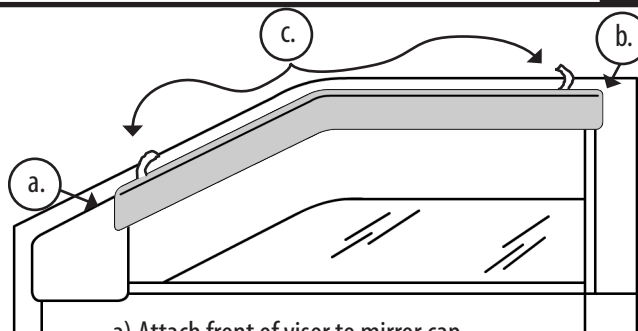

Clean and dry area where visor will attach.

1

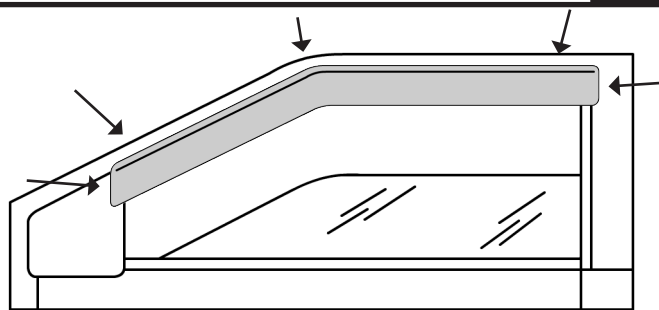

- a) Remove tape liner from both ends.
b) Peel 2" of tape liner from each end of at the top.

2

- a) Attach front of visor to mirror cap.
b) Attach top and rear of visor to painted surface.
c) Remove tape liner by pulling on loose ends.

3

Apply firm pressure to top and sides of visor.

4

**** Repeat Steps 1-4 for Each Vent Visor ****

Important Safety Information

- Wash with mild soap and dry with a clean cloth
- Do not run through automatic "brush style" car wash
- Avoid using cleaning solvents of any kind
- Make sure vent visors are properly secured to vehicle before driving
